

# West Virginia Schools Balanced Scorecard

**West Virginia Board of Education  
2018-2019**

**David G. Perry**, President  
**Miller L. Hall**, Vice President  
**Thomas W. Campbell, CPA**, Financial Officer

**F. Scott Rotruck**, Member  
**Debra K. Sullivan**, Member  
**Frank S. Vitale**, Member  
**Joseph A. Wallace, J.D.**, Member  
**Nancy J. White**, Member  
**James S. Wilson, D.D.S.**, Member

**Carolyn Long**, Ex Officio  
Interim Chancellor  
West Virginia Higher Education Policy Commission

**Sarah Armstrong Tucker, Ed.D.**, Ex Officio  
Chancellor  
West Virginia Council for Community and Technical College Education

**Steven L. Paine, Ed.D.**, Ex Officio  
State Superintendent of Schools  
West Virginia Department of Education

## What is the purpose of the West Virginia Schools Balanced Scorecard?

The West Virginia Schools Balanced Scorecard is designed to provide a clear snapshot of school performance and growth from year to year. Each public school in the state will receive a scorecard that gives parents, students, educators and communities clear and concise information on where their school is excelling and in what areas their school may need to improve.

The Balanced Scorecard also meets the school accountability requirements of the bipartisan Every Student Succeeds Act of 2015 (ESSA), which reauthorized the Elementary and Secondary Education Act of 1965 (ESEA). A major part of each state's required ESSA plan is an accountability system that establishes annual measurable objectives.

## What will the Balanced Scorecard show?

Because schools will be evaluated on multiple indicators, a balanced scorecard is key to helping parents and community members understand how well their schools are performing. Each school will be evaluated on indicators of academic achievement, English learner proficiency and student success or school quality.

Within each indicator, schools can achieve one of four performance levels: exceeds standard, meets standard, partially meets standard or does not meet standard. Evaluating performance levels within each indicator allows stakeholders to see where their school is most successful and allows schools to receive targeted support in areas where improvement is needed.

## What do the indicators mean?

The Balanced Scorecard will evaluate schools on the following indicators:

- **Performance in English language arts and math** – this indicator considers test scores from the annual statewide assessment in grades 3-8 and 11.
- **Benchmark indicator** – this indicator measures student achievement on the state classroom benchmark assessment in grades 3-8.
- **Four- and five-year cohort graduation rates** – this indicator considers the percentage of students who graduate in four and five years at the high school level.
- **English language learner progress** – this indicator measures how well students who are learning English as a second language are progressing in their mastery of the English language in the four domains of speaking, reading, writing and listening.
- **Student success** – this indicator considers the percentage of elementary and middle school students with greater than 90% attendance and students with no out-of-school suspensions. At the high school level, this indicator considers: students with greater than 90% attendance; number of credits earned by 10th graders; and, completion of CTE programs, Advanced Placement and International Baccalaureate credits, and dual credit college courses among 12th graders.

## What are the performance levels?

School performance is based on five indicators that are measured by four color-coded performance level classifications.

- **Green: Exceeds Standard**, indicates distinctive school performance on a particular indicator measure and exceeds the expected level of performance set by the State.
- **Blue: Meets Standard**, indicates that a school's performance on a particular indicator measure is within the range of expected performance set by the State.
- **Gold: Partially Meets Standard**, indicates that a school's performance on a particular indicator measure is approaching the expected range of performance set by the State.
- **Red: Does not Meet Standard**, indicates that a school's performance on a particular indicator measure is unacceptably below the expected level of performance set by the State

## What happens when schools are not performing well?

The benefit of the new balanced scorecard is that each indicator is analyzed individually. With no cumulative scores, schools are given the opportunity to focus efforts and resources on areas that need improvement. Therefore, the balanced scorecard will allow for heightened community awareness around local schools, while also allowing for targeted supports for schools in specific areas.

County school systems will provide additional support and monitoring. Schools that continue to perform poorly with county intervention will receive additional intervention at the state level.

## What supports are available to schools?

There are several supports that will be made available to schools that need to improve performance in any of the indicators.

Title I schools that are in need of improvement in the majority of indicators will be eligible to receive Title I school improvement funding to support efforts to improve student outcomes. The West Virginia Department of Education will provide technical assistance to county school systems in the effective implementation of improvement interventions.

Additionally, the Division of Teaching and Learning offers a wealth of resources and supports for schools focusing on a multitude of topics that target college- and career- readiness for all learners. Some of the topics for which such resources exist include, pre-k through grade 12 mathematics (via the WV Math for Life Campaign), as well as early literacy supports and resources as part of the WV Leaders of Literacy: Campaign for Grade-level Reading. Supports vary from capacity-building and face-to-face professional learning to more independent types of study such as e-learning courses, professional learning community guides and website resources.

---

## What does statewide success look like?

The Every Student Succeeds Act requires states to establish long-term goals, and annual targets for progress toward those goals, for each school on four measures used within states' accountability systems. West Virginia outlined long-term goals to be met by 2030, the year the 2017 kindergarten class will graduate high school. This will allow the goals will be met during a generation of students.

West Virginia's long-term goals will be measured based on: academic achievement in English language arts (ELA) and mathematics, as measured by proficiency on the state's annual summative assessment; the four-year adjusted cohort graduation rate and progress in achieving English language proficiency, as measured by the state's annual English assessment, among students for whom English is not their primary language.

## What is the law governing West Virginia's accountability system?

Senate Bill 359, amended §18-2E-5 during the 2013 Legislative session, allowed the West Virginia Board of Education (WVBE) to adopt a policy to define how schools are held accountable and how school systems are accredited. In 2016, Governor Justice charged the WVBE with creating an accountability system that was more fair and accurate in order to accelerate student learning.

All states were required to submit a consolidated state plan to the U.S. Department of Education in 2017 to comply with ESSA. In order to receive approval to move forward with the plan, each state had to clearly lay out four main components – one of them being a school accountability system to provide support and improvement. After months of stakeholder meetings and research, West Virginia was able to create an accountability system under the charge of Governor Justice while meeting the ESSA requirements at the federal level.

The School Accountability System is based on four levels of performance. These are color coded for easier use. These performance levels include:

- Green: Exceeds Standard** indicates that a school's performance on a particular indicator is above the expected level set by the State Board of Education.
- Blue: Meets Standard** indicates that a school's performance on a particular indicator is within the range of expected performance set by the State Board of Education.
- Gold: Partially Meets Standard** indicates that a school's performance on a particular indicator is not yet at the expected range set by the State Board of Education.
- Red: Does Not Meet Standard** indicates that a school's performance on a particular indicator is substantially below the expected level set by the State Board of Education.

The accountability system is based on multiple indicators that assess student outcomes in key areas. These indicators differ by programmatic level (elementary and middle schools compared to high school) and include:

**Academic performance** points are awarded in a progressive manner to correspond to student achievement levels in English language arts and mathematics. School performance is based on the percentage of points earned by students on a 125-point scale. Schools at all programmatic levels are assessed on this indicator.

- 80 to 100% **Exceeds Standard**
- 65 to 80% **Meets Standard**
- 50 to 65% **Partially Meets Standard**
- Less than 50% **Does Not Meet Standard**

**The Benchmark Indicator for elementary and middle schools** will consider student achievement on state benchmark assessments. A growth measure that rewards the progress students make between the beginning of the year and the end of the year is in development and will be used in future years.

**Cohort graduation rates for high schools** is divided into two categories: students graduating in four years and those graduating in five years.

- 95 to 100% **Exceeds Standard**
- 90 to 95% **Meets Standard**
- 80 to 90% **Partially Meets Standard**
- Less than 80% **Does Not Meet Standard**

**Progress toward English Language Proficiency** applies to those students who are not English language speakers and are learning English as a second language. The state's long-term goal is for 85% of English Language Learners to reach English Language Proficiency by the 2029-30 school year.

- 95 to 100% **Exceeds Standard**
- 85 to 95% **Meets Standard**
- 70 to 85% **Partially Meets Standard**
- Less than 70% **Does Not Meet Standard**

**Student Success** is a multi-measure indicator that includes:

**Attendance** – percent of elementary, middle, and high school students attending 90% or more instructional days

- 95 to 100% **Exceeds Standard**
- 90 to 95% **Meets Standard**
- 80 to 90% **Partially Meets Standard**
- Less than 80% **Does Not Meet Standard**

**Behavior** – percent of elementary and middle school students with no out-of-school suspensions

- 95 to 100% **Exceeds Standard**
- 90 to 95% **Meets Standard**
- 80 to 90% **Partially Meets Standard**
- Less than 80% **Does Not Meet Standard**

**On-track to graduation** – percent of 10th grade students meeting credit earned criteria

- 95 to 100% **Exceeds Standard**
- 90 to 95% **Meets Standard**
- 80 to 90% **Partially Meets Standard**
- Less than 80% **Does Not Meet Standard**

**Post-secondary achievement** – percent of 12th grade students meeting selected post-high school achievement criteria

- 80 to 100% **Exceeds Standard**
- 65 to 80% **Meets Standard**
- 50 to 65% **Partially Meets Standard**
- Less than 50% **Does Not Meet Standard**

The Every Student Succeeds Act requires states to establish long-term goals, and annual targets for progress toward those goals, for each school on four measures used in states' accountability systems. These include:

- academic achievement in English language arts (ELA), as measured by proficiency on the state's annual summative assessment.
- academic achievement in mathematics, as measured by proficiency on the state's annual summative assessment.
- the four-year adjusted cohort graduation rate;
- progress in achieving English language proficiency, as measured by the state's annual English language assessment, among students for whom English is not their primary language

West Virginia's long-term academic achievement goals for ELA and mathematics are to reduce the gap between the proficiency rates in 2017 and 100 percent proficiency by half by the end of the 2029-2030 school year. The statewide long-term goals and annual improvement targets for academic achievement are outlined below:

Subject	2016-2017 Proficiency Rate	2029-2030 Long-Term Goal (Half the Distance to 100%)	Difference Between Long-Term Goal and 2016-2017 Proficiency	Expected Annual Improvement to Reach Goal
Mathematics	34.8%	67.4%	32.6%	2.5%
English Language Arts	47.5%	73.8%	26.2%	2.0%

The long-term goals for four-year adjusted cohort graduation rate and for English learner progress are outlined below:

Subject	2016-2017 Rate	2029-2030 Long-Term Goal	Difference Between Long-Term Goal and 2016-2017 Rates	Expected Annual Improvement to Reach Goal
Four-year Cohort Graduation	89.8%	95.0%	5.2%	0.37%
English Learner Progress	56.1%	85.0%	28.9%	2.2%

Each school in the state has its own long-term goals for these measures and their own annual targets. Whether a school meets its annual targets is shown on the accountability balanced scorecard by a "✓." Below is an example of how this looks on the scorecard:

Exceeds Standard		Meets Standard		Partially Meets Standard		Does Not Meet Standard		Below Cell Size	
Elementary/Middle School	Academic Performance		Benchmark Indicator		English Learners	Student Success			
	English Language Arts	Mathematics	English Language Arts	Mathematics	English Learner Progress	Attendance	Behavior		
<b>Black Bear Elementary School</b>	✓	✓							
<b>Cardinal Elementary School</b>	✓	✓							
<b>Sugar Maple Elementary School</b>	✓	✓							

# West Virginia Schools Balanced Scorecard

## Sample Balanced Scorecard Dashboard

- Each school's performance level will be displayed for each indicator in a balanced scorecard dashboard using the color that corresponds to the performance levels indicated in the table below.
- Stakeholders will be able to review school performance more comprehensively rather than be focused on a summative rating that does not provide a full picture of school performance.
- The balanced scorecard approach allows improvement efforts and resources to be more strategically targeted to each individual school's specific needs and facilitates the formation of statistical neighbors to support continuous improvement around each specific indicator in the accountability system.

Exceeds Standard		Meets Standard		Partially Meets Standard		Does Not Meet Standard		Below Cell Size

Indicators Defined

# Academic Performance Indicator for Mathematics and English Language Arts

Academic performance is a measure of students' results from the West Virginia General Summative Assessment for 3<sup>rd</sup> through 8<sup>th</sup> graders and the SAT School Day Assessment for 11<sup>th</sup> graders. There are four achievement levels on these tests and schools earn points for every student in each level. More points are awarded for higher levels of achievement. Two steps are needed to calculate academic performance. Below is an example for a school where 188 students were tested.

**Step 1.** Multiply the number of students at each performance level by the points for that level. Sum the points across all levels to get the cumulative points for the school.

Achievement Level	Number of Students		Points for this Level	=	Points Awarded
Exceeds Standard	53	x	1.25	=	66.25
Meets Standard	63	x	1.00	=	63.00
Partially Meets Standard	40	x	0.50	=	20.00
Does Not Meet Standard	32	x	0.25	=	8.00
Total Number of Students =	188		Cumulative Points =		157.25

**Step 2.** Divide the cumulative points from Step 1 by the number of students tested, then multiply by 100 to determine the overall points earned by the school.

Cumulative Points	Students Tested		Overall Points
(157.25	÷	188)	x 100 = 83.6

**Step 3.** Divide the overall points from Step 2 by 125 to determine the percent of points earned by the school. (A maximum of 125 overall points is possible if all students in a school test at the highest achievement level—that is, if 100% of students earn 1.25 points.)

Overall Points	Total Points Possible	Percent of Points
83.6	÷	125 = 66.9

The achievement level categories from the student assessment also are used to describe school performance based on percent of overall points earned. The percent of points for the school in the above example was 66.9%. This school “meets standard” for academic achievement.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
80% or Higher	65 to 80%	50% to 65%	Less than 50%

Academic performance is calculated separately for English language arts and mathematics for students in grades 3 through 8 and 11 enrolled at a school for at least 135 of 180 instructional days. An adjustment also is made if assessment participation falls below 95%.

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how accountability indicators are calculated.

# Academic Benchmark Indicator for Mathematics and English Language Arts for Elementary and Middle Schools

The Academic Benchmark Indicator is a measure of student’s results from Classroom Benchmark Assessments (CBA) for 3<sup>rd</sup> through 8<sup>th</sup> graders. The indicator is implemented in two phases. For the 2017-2018 school year (Phase 1), the measure is based on a single end-of-year CBA, for which there are four performance levels. Schools earn points for every student in each level. More points are awarded for higher levels of achievement. Two steps are needed to calculate academic performance. Below is an example for a school where 159 students were tested with a CBA.

**Step 1.** Multiply the number of students at each performance level by the points for that level. Sum the points across all levels to get the cumulative points for the school.

Achievement Level	Number of Students		Points for this Level	=	Points Awarded
Exceeds Standard	35	x	1.25	=	43.75
Meets Standard	45	x	1.00	=	45.00
Partially Meets Standard	42	x	0.50	=	21.00
Does Not Meet Standard	37	x	0.25	=	9.25
Total Number of Students =	159		Cumulative Points =		119.00

**Step 2.** Divide the cumulative points from Step 1 by the number of students tested, then multiply by 100 to determine the overall points earned by the school.

Cumulative Points	Students Tested		Overall Points
(119.00	159)	x 100	= 74.84

**Step 3.** Divide the overall points from Step 2 by 125 to determine the percent of points earned by the school. (A maximum of 125 overall points is possible if all students in a school test at the highest achievement level—that is, if 100% of students earn 1.25 points.)

Overall Points	Total Points Possible		Percent of Points
76.84	125	=	61.5

The achievement level categories from the student assessment also are used to describe school performance based on percent of overall points earned. The percent of points for the school in the above example was 61.5%. This school “partially meets standard” for the Academic Benchmark Indicator.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
80% or Higher	65 to 80%	50% to 65%	Less than 50%

The indicator is calculated separately for English language arts and mathematics for students in grades 3 through 8 enrolled at a school for at least 135 of 180 instructional days. An adjustment also is made if participation in the CBA assessment falls below 95%.

In the 2018-2019 school year and afterward, a beginning-of-year CBA will be given and students' progress will be measured by comparing the beginning-of-year CBA result to their end-of-year summative academic assessment score.

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how accountability indicators are calculated.

## Cohort Graduation Rate Indicator

---

**Cohort Graduation** represents the the percentage of a cohort of students who graduate within a specific time period. For school accountability purposes, both 4-Year and 5-Year cohort graduation rates are used.

A graduation cohort is established for each group of students enrolling in the 9<sup>th</sup> for the first time. At that time, two targets for graduation years are set. The 4-Year cohort graduation target is set four academic years into the future; the 5-Year target is set five academic years into the future. For example, students entering the 9<sup>th</sup> grade for the first time in the 2015-2016 school year would have a 4-year target graduation school year of 2018-2019. Similarly, the 5-year target graduation school year for this cohort of students would be 2019-2020 as shown below.

The cohort is adjusted over time as students transfer into and out of schools. If a student enters a WV high school for the first time in a grade other than 9, their target graduation year is projected based on what would have been their 9<sup>th</sup> grade year. When students transfer between schools within West Virginia, they are placed in the cohort at the new school based upon the year in which they first enrolled in 9<sup>th</sup> grade.

The cohort graduation rate is a percentage of students within a cohort earning a regular high school diploma by the target graduation year. Two steps are used to calculate the graduation rate measure.

- Step 1.** Total the number of students within a graduation cohort earning a regular high school diploma by the target graduation year.
- Step 2.** Divide the total points awarded in Step 1 by the total number of students in the graduation cohort.

For example, a school has 105 students in its initial graduation cohort. Over the next 4 years, 5 of those students transfer to another high school, and 2 new students transfer into the school. The adjusted cohort size is 102 (i.e.,  $105 - 5 + 2 = 102$ ). Of the students in the adjusted cohort, 89 earn a regular high school diploma within 4 years. The 4-year cohort graduation rate for the school is calculated as follows:

$$89 \text{ diploma earners} \div 102 \text{ students in the cohort} = 87.25\%$$

The overall percentage for the school in the above example was 75.0%. Using the school performance benchmarks shown below, this school “partially meets standard” for the 4-year graduation rate.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
95% or Higher	90% to 95%	80% to 90%	Less than 80%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

## Progress Toward English Language Proficiency

West Virginia has a small but growing population of students for whom English is not their primary language. **Progress in English Language Proficiency** tracks the progress of these students across four English language domains—listening, reading, speaking, and writing. The objective is for English learners in grades 3 through 8 and 11 to reach English proficiency in six years or less on all four domains. Progress depends on students’ initial proficiency level status when identified as an English learner (EL). To show adequate progress, students must reach and maintain the next level of performance for a period of time as shown in the chart below.

For example, a student entering a school with a “Beginning” status in year 1 must reach an “Early Intermediate” level in year 2. In years 3 through 5, the student must reach and maintain an “Intermediate” status to show adequate progress. In year 6, the student must reach proficiency. This process is repeated for all four domains.

Initial ELP in Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
Beginning	Early Intermediate	Intermediate	Intermediate	Intermediate	Proficient
Early Intermediate	Intermediate	Intermediate	Intermediate	Proficient	
Intermediate	Intermediate	Intermediate	Proficient		
Early Advanced	Proficient				
Advanced	Proficient				

Two steps are used to calculate the progress in English language proficiency measure:

**Step 1.** Award 1.0 point for every English learner (EL) student who has shown adequate progress on each of the four English language domains of listening, reading, speaking, and writing

**Step 2.** Sum the total points awarded in Step 1 and divide by the total number of EL students.

For example, a school of 22 full academic year English learner students has:

- 5 with **Beginning** initial status that are at **Intermediate** status on all domains in year 3, but 3 with **Beginning** initial status that are still at **Early Intermediate** in year 3
- 9 with **Early Intermediate** initial status are at **Intermediate** on all domains in year 3
- 8 with **Intermediate** initial status are at **Intermediate** on all domains in year 3

In this example, of the 5 students with *Beginning* initial status, 3 were still at *Early Intermediate* and did not make adequate progress, but all remaining students did make progress. The measure is calculated as follows:

Add the total number of students who demonstrate adequate progress (2 + 9 + 8 = 19)

$$19 \text{ students progressed} \div 22 \text{ FAY students} = 86.4\%$$

The overall percentage for the school in the above example was 86.4%. Using school performance benchmarks shown below, this school “meets standard” for progress in English language proficiency.

<b>Exceeds Standard</b>	<b>Meets Standard</b>	<b>Partially Meets Standard</b>	<b>Does not Meet Standard</b>
95% or Higher	85% to 95%	70% to 85%	Less than 70%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

# Student Success Indicator: Attendance

---

**Attendance** represents the percentage of full academic year students present for at least 90% of instructional days, excluding absences resulting from out-of-school suspensions. Two steps are used to calculate the attendance measure.

- Step 1.** Award 1.0 point for every student whose actual attendance was 90% or more of all instructional days, excluding absences resulting from out-of-school suspensions;
- Step 2.** Divide the total points awarded in Step 1 by the total number of students.

For example, a school of 176 students has 132 students who have been present for 90% or more of instructional days, each being awarded 1.0 points. The attendance measure is calculated as follows:

$$132 \text{ points} \div 176 \text{ students} = 75.0\%$$

The overall percentage for the school in the above example was 75.0%. Using the school performance benchmarks shown below, this school “does not meet standard” for attendance.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
95% or Higher	90% to 95%	80% to 90%	Less than 80%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

# Student Success Indicator: Behavior

---

**Behavior** represents the percentage of full academic year students in each school who received no out-of-school suspensions within a school year. The measure is calculated using certified student behavior records, however exemptions are made for out-of-school suspensions for behaviors defined as eminently dangerous, illegal and/or aggressive which are addressed in other federal or state laws. Two steps are used to calculate the attendance measure.

- Step 1.** Award 1.0 point for every student who has received no out-of-school suspensions within the school year;
- Step 2.** Divide the total points awarded in Step 1 by the total number of students.

For example, a school of 176 students has 163 students having no out-of-school suspensions, each being awarded 1.0 points. The behavior measure is calculated as follows:

$$163 \text{ points} \div 176 \text{ students} = 92.6\%$$

The overall percentage for the school in the above example was 92.6%. Using the school performance benchmarks shown below, this school “meets standard” for behavior.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
95% or Higher	90% to 95%	80% to 90%	Less than 80%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

# Student Success Indicator: On-Track to Graduation

**On Track to Graduation** represents the percentage of grade 10 full academic year students on track for completing the credit requirement for high school graduation. To meet the on-track criteria, students must earn at least twelve (12) credits overall and earn at least two (2) credits each in the four primary content areas (i.e., English, mathematics, science, and social studies) by the end of their 10<sup>th</sup> grade year. This measure applies only to high schools.

Three steps are used to calculate on-track to graduation:

- Step 1.** Award 0.5 points for every grade 10 student who has earned at least 12 course credits.
- Step 2.** Award 0.5 points for every grade 10 student who has earned at least two credits in English, mathematics, science, and social studies subject areas.
- Step 3.** Sum the total points awarded in Steps 1 and 2, and divide by the total number of students meeting the inclusion criteria.

For example, a school of 115 grade 10 students has 103 students who earned 12 or more credits, each being awarded 0.5 points. Of the 115 students, 99 earned at least two course credits in English, mathematics, science and social studies. The on-track measure is calculated as follows:

$$\begin{array}{r} 103 \times 0.5 \text{ points} = 51.50 \text{ points} \\ 99 \times 0.5 \text{ points} = 49.50 \text{ points} \\ \hline \text{Total } 101.00 \text{ points} \end{array}$$

$$101.00 \text{ Total points} \div 115 \text{ students} = 87.8\%$$

The overall percentage for the school in the above example was 87.8%. Using the school performance benchmarks shown below, this school “partially meets standard” for on-track to graduation.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
95% or Higher	90% to 95%	80% to 90%	Less than 80%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

# Student Success Indicator: Post-Secondary Achievement

**Post-Secondary Achievement** represents the percentage of grade 12 full academic year students who acquire credentials toward college and/or career readiness during their high school (grades 9 – 12) years. This measure applies only to high schools.

Two steps are used to calculate the post-secondary achievement measure:

- Step 1.** Award 1.0 point for every grade 12 student who has earned at least one of the following college and/or career credentials during their enrollment in high school:
- One or more college readiness benchmarks through Advanced Placement (AP) or International Baccalaureate (IB) program exams;
  - Completion of college-credit-bearing coursework with a grade of A, B, or C; and/or
  - Completion of the four (4) required courses in a State approved Career Technical Education (CTE) program of study.
- Step 2.** Sum the total points awarded in Step 1 and divide by the total number of grade 12 students.

For example, a school of 192 full academic year grade 12 students has 156 students who accomplished at least one of the college and/or career readiness criteria above, each being awarded 1.0 points. The post-secondary achievement measure is calculated as follows:

$$156 \text{ points} \div 192 \text{ students} = 81.3\%$$

The overall percentage for the school in the above example was 81.3%. Using school performance benchmarks shown below, this school “exceeds standard” for post-secondary achievement.

Exceeds Standard	Meets Standard	Partially Meets Standard	Does not Meet Standard
80% or Higher	65% to 80%	50% to 65%	Less than 50%

Visit [www.mywvschool.org](http://www.mywvschool.org) for more detailed information about how all accountability indicators are calculated.

Steven L. Paine, Ed.D.  
West Virginia Superintendent of Schools
